

NEWS RELEASE

TFT SHIPS NEW SOFTWARE FOR EAS911 ENCODER/DECODER

San Jose, California – March 2, 2007 – Today TFT, Inc., a leading manufacturer of Emergency Alert System (EAS) equipment began shipping software/firmware version V.87.0 that will automatically adjust advanced (daylight savings) time in accordance with changes adopted recently by Congress and implemented by Executive Order of the President.

The new version of software/firmware, V.87.0, will automatically adjust local time displays and calculation of emergency event time stamps and durations on the TFT EAS 911 Encoder/Decoder. Other features of V.87.0 will include

- Ability to screen incoming message on Originator field of EAS messages
- Capability of using two selected character generators for separate video streams
- Enhanced programming for additional locations for One-Button Weekly Test function
- Clarification of digital voice recorder use

Cost of the new software/firmware, which will consist of two new EPROMs and a comprehensive User's Guide addendum is \$130, plus shipping and handling. Order forms are available from Customer Service and will soon be posted on the TFT website, www.TFTInc.com.

Work is also progressing on new software/firmware for other TFT EAS models, including the EAS 911D EAS Decoder Only and the Safety 1st, EAS911i. Additional interfaces for a myriad of other graphics platforms will follow shortly. Shipping of a backlog of orders will continue through next week so that customers will have time for installation before March 11th.

TFT, headquartered in San Jose, California, has been manufacturing monitoring, STL (both digital and analog), and EAS equipment for the broadcast industry since 1970.
